

Fisheries Technician, Montana State University

Agency: Montana State University

Location: Bozeman, MT

Job Category: Temporary Technician

When: Summer 2025

Salary: \$15-17 per hour

The Montana Cooperative Fishery Research Unit and the Department of Ecology at Montana State University are seeking 1 technician for the Summer to assist a PhD. student with data collection on trout streams in southwest Montana. The successful candidate will be tasked with collecting information from anglers who have caught tagged fish, electrofishing, and fish monitoring. This information will be used as part of a larger research effort investigating trout population declines in southwest MT. The position full time. This is a great opportunity to gain research and field experience.

Suitable candidates will demonstrate an interest in fisheries research. Desired qualifications include familiarity with excel, organization skills, self-motivation, curiosity, and interest in cold water trout fisheries. The hired technician will gain experience interacting with angling stakeholders, data management, and data analyses.

To apply, please send a resume, brief letter describing your interest in the position and relevant qualifications, research interests, and contact information for 1-3 references to Max Rubino (Max.rubino@montana.edu). All questions about the position can also be directed to Max Rubino. Application review will begin immediately and remain open until the position is filled.
