

Undergraduate Research Assistant

Job Description:

Looking for a motivated, enthusiastic undergraduate student to assist in aquatic plant culture maintenance in the greenhouse. The position will be paid, part time (minimum 20hrs per week), \$16 per hour, for the summer and can continue into the fall.

Primary responsibilities:

Water changes for plant cultures, replanting of plant cultures, making salt buffer, aiding in experimental setup and take down, etc. Additionally, students will learn basic molecular techniques such as how to perform DNA extractions in the lab.

Qualifications:

Successful applicants will be self-motivated, dependable, and enthusiastic about research. Applicants must be actively enrolled students at MSU and possess at least a 3.0 GPA. Ideally, applicants will be interested in plant sciences, biology or related fields. Applicants must be able to work in the lab over the summer months.

Application Process:

This position is available for the summer and start dates are flexible.

Please email your resume to Ashley Wolfe (ashley.wolfe3@montana.edu) & Del Hannay (del.hannay@student.montana.edu) and we will set up an interview with you.
